Communication equipment, misc.

Radio Frequency Amplifier - Page 1 of 2

View Online at https://aerobasegroup.com/nsn/5996-01-393-4690

Reliability Indicator:
Not established
Inclosure Material:
Aluminum
Overall Length:
1.640 inches
Overall Height:
0.625 inches
Overall Width:
1.000 inches
Surface Luster:
Matte
Fragility Factor:
Moderately delicate
Average Life Measurement:
Not rated
End Application:
4920nce399649
Basic Shape Style:
Rectangular or square
Inclosure Type:
Encased
Operating Control Method:
Automatic
Installation Design:
Mechanical
Control Type:
Remote
Special Handling Feature:
Fragile
Circuit Construction Type:
Solid state
Connection Type And Location:
Receptacle, coaxial left side and receptacle, coaxial right side and terminal stud right side and ground terminal right side
Connection Contact Type And Quantity:
1 ground terminal internal and 2 receptacle, coaxial internal and 1 terminal stud internal
Color:
Any acceptable
Special Markings:
Rf output; gnd; dc bias
