Average Life Measurement:

Not rated

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Free-standing

Circuit Construction Type:

Solid state

Special Features:

Emanual current probe amplifier; push button auto balance/degauss; bright led current/division display; elimiates need to caligbrate amplifier with specific probes; plugs in tm 500/5000 power supply

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
