Average Life Measurement:

Not rated

End Application:

Test station elec

Circuit Construction Type:

Solid state

Special Features:

Bmicrowave preamplifier; freq. Range 2.0 to 26.5 ghz; pwr flatness +/-4 db typical; input & output impedance 50 ohm, ; rev. Isolation >50 db typical; pulse transmission capability rise/fall time

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
