Product Name:

Interface assembly, high power amplifier

Special Features:

Voltage is 115/200 vac and 280 vdc; frequency is 3 phase, 400 hz; power consumption is 7 watts max

Supplementary Features:

The high power amplifier interface adapter operates in conjunction with the mids receiver-transmitter (rt) and high power amplifier group (hpag). The i/f adapter receives serial data signals from the rt at various frequencies, converts them to parallel format (14 lines) signals, and transmits them to the hpag.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
