**Product Name:**

Interface assembly, high power amplifier

**Special Features:**

Voltage is 115/200 vac and 280 vdc; frequency is 3 phase, 400 hz; power consumption is 7 watts max

**Supplementary Features:**

The high power amplifier interface adapter operates in conjunction with the mids receiver-transmitter (rt) and high power amplifier group (hpag). The i/f adapter receives serial data signals from the rt at various frequencies, converts them to parallel format (14 lines) signals, and transmits them to the hpag.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
