Environmental Protection:

Watertight

Average Life Measurement:

Not rated

Basic Shape Style:

Rectangular or square

Inclosure Type:

Hermetically sealed

Circuit Construction Type:

Solid state

Special Features:

The transmission unit can be operated from 50/60 hz, 115, 230, 380 or 460 vac input power.

Supplementary Features:

The 1977023-2 mk37 vt transmission unit is part of the mk37 vt (vision technology) gyrocompass control system. The gyrocompass supplies the step heading input data from the step transmitter in the gyrocompass. The transmission unit amplifies the step heading input to provide sufficient power to drive an equivalent load of 12 step repeaters.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
