Reliability Indicator:

Established

Overall Length:

2.095 inches

Overall Height:

0.490 inches

Overall Width:

1.300 inches

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Module

Circuit Construction Type:

Solid state

Connection Type And Location:

Dual panel jack left side

Special Features:

Power requirements; the amplifier shall meet all the performance requirements of section 3.2 with a supply voltage of plus 10 vdc to plus 17vdc. The current at plus 15vdc shall be 850 ma. Internal reverse voltage protection shall be provided

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
