Average Life Measurement:

Not rated

End Application:

Video equipment upgrade

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Circuit Construction Type:

Solid state

Special Features:

Dwg name, vea-684 video equalizing amplifier, has one looping input, eight outputs; differential input, selectable ac or dc input coupling; jumper selectable clamping, cable eq up to 300 (1,000 ft), belden 8281 or alternate cable type eq

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
