Operating Temperature Range:

-45.0/+85.0 degrees celsius

Storage Temperature Range:

-65.0/+150.0 degrees celsius

Average Life Measurement:

Not rated

Basic Shape Style:

Irregular

Inclosure Type:

Encased

Circuit Construction Type:

Solid state

Product Name:

Monolithic amplifier

Special Features:

Low thermal resistance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
