Basic Shape Style:

Cylindrical

Operating Control Method:

Automatic

Circuit Construction Type:

Solid state

External Dc Operating Voltage In Volts:

9.0 single voltage and 32.0 single voltage

Special Features:

Flowmeter input rf carrier, temperature input rtd, output analog voltag (0-5 vdc) for flow tare and temp., enclosure nema 4x with 1/2 npt conduit connections, approvals ce mark

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
