End Application:

Milpa and output pack system

Circuit Construction Type:

Solid state

Special Features:

Technomad I24 amplifier

Functional Description:

Links pa elements over existing ethernet infrastructure; acts as transmitter or receiver of audio (must be pre-set by technomad).

Supplementary Features:

One ethernet link required per pa element, i.E. Audio source pack, output pack, etc.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
