**Inclosure Material:**

Plastic

**Operating Temperature Range:**

-45.0/+85.0 degrees celsius

**Storage Temperature Range:**

-65.0/+150.0 degrees celsius

**End Application:**

Cellular, pcs, communication receivers and transmitters

**Basic Shape Style:**

Rectangular or square

**Circuit Construction Type:**

Solid state

**Frequency Per Channel:**

8.0 gigahertz operating channel

**Product Name:**

Monolithic amplifier

**Special Features:**

Dc 5 ghz

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A32200
