Basic Shape Style:

Rectangular or square

Product Name:

Broadband solid state mosfet fm amplifier

Special Features:

Very high efficiency mosfet technology amplifier; only 10-20 w drive input power to reach or exceed rated output power; automatic gain control providing fixed output power even in case of fluctuating drive power; high reliability, easy handling and consistent performance; totally broadband, no tuning requirement; excessive temperature and excessive drive power protection; compact size with built-in high-efficiency switching power supply; easy access due to modular construction; overload reset system with indicator lights; meets or exceeds all fcc and ccir requirements; easily replaceable standard components; proportional auto-foldback of output power in the event of excessive vswr; full remote control and telemetry capability, with all main parameters on rear terminal board; 500 w rated output power; ambient temperature range 0 degrees celsius to 45 degrees celsius; 90 percent, non-condensing maximum humidity

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
