Overall Length:

16.500 inches

Overall Height:

3.500 inches

Overall Width:

12.000 inches

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Circuit Construction Type:

Solid state

Operating Ac Frequency In Hertz:

60.0 single voltage

External Ac Operating Voltage In Volts:

120.0 single voltage

Product Name:

Power vector module amplifier

Special Features:

35 watt module amplifier; with 8 modular bays; plug in module; lockable switch for transformer-coupled outputs or a direct low-impedance output; screw terminal for master mute and remote volume control functions; signal processing insert jacks allow external equipment to be inserted between the pre-amp output and the power amp input

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
