NSN 5996-01-571-1206

Radio Frequency Amplifier - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5996-01-571-1206 **Overall Length:** 19.000 inches **Overall Height:** 22.000 inches **Overall Width:** 8.750 inches **Basic Shape Style:** Rectangular or square **Inclosure Type:** Encased Installation Design: Rack Frequency Per Channel: 20.0 megahertz operating channel and 500.0 megahertz operating channel **Average Power Rating Per Channel:** 550.0 watts output **External Ac Operating Voltage In Volts:** 180.0 single voltage and 260.0 single voltage Phase: Single **Special Features:** Suitable for rf, vhf & uhf high power linear applications; advanced push pull mosfet devices technology providing high gain, wide dynamic range, low distortions and good linearity; small and lightweight; front panel 10 turnsmanual gain adjustment and front paneltype n female Shelf Life: **Unit Of Measure:**

N/a

Demilitarization:

Yes - demil/mli

Fiig:
