Amplifier Name:

Cmss cvr adapter

Amplifier Quantity:

1

Amplifier Identifying Number:

M1090

Special Features:

Cvr adapter operates a differential summing amplifier for combining microphone, communications, intercom and paging audio into one isolated output to the cvr; three biased mic inputs, three bias disable inputs, three aux inputs, and transformer coupled output to the cvr; transformer coupled output stage can handle wiring runs to cvr as long as 200 feet

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T213-n
