Overall Length:

19.000 inches

Overall Height:

5.200 inches

Overall Width:

16.300 inches

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Circuit Construction Type:

Solid state

Special Features:

Independent, user-defeatable clip limiters; balanced 1/4 inch trs and xlr inputs; binding posts and speakonr-type outputs; stereo, parallel and bridge mono amp modes; signal level led indicators at -40, -20 and 10; front mounted detent gain controls; ground lift switch; short-circuit, open circuit, thermal, ultrasonic and rf protection; 2 variable speed fans; 5000 watts power; barrier strip inputs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
