Inclosure Material:

Steel

Overall Length:

16.250 inches

Overall Height:

5.250 inches

Average Life Measurement:

Not rated

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Operating Control Method:

Manual

Control Type:

Remote

Circuit Construction Type:

Solid state

Switching Rate Per Second:

2

Product Name:

Power amplifier

Special Features:

Connects to a 100 mbps ethernet network allowing remotely controlled and monitored; provides real time digital audio; two processors, 32 bit, floating point; cooling is continuously variable speed forced air, front to back airflow; front panel indicators; output connector has one four-pole terminal strip for every two channels with a touch-proof cover; accepts up to 10 awg terminal forks

Color:

Black

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
