Average Life Measurement:

Not rated

End Application:

B-1 aircraft

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Module

Circuit Construction Type:

Solid state

Product Name:

Three-stage gaas microwave monolithic integrated circuit (mmic) amplifier

Special Features:

6x gull-wing terminals, low noise figure and gain for applications from 0.5 to 6ghz; 150 degrees c absolute maximum channel temperture; internally biased, single +5v power supply (14ma); 50 ohms, vswr-in 2.3 typ, vswr-out 1.7 typ

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
