Overall Length:

6.250 inches

Overall Height:

1.000 inches

Overall Width:

4.375 inches

Special Features:

Components: bracket 1, capacitor 18, coil 2, connector 1, pad 4, printed wiring board 1, resistor 20, semiconductor 1, socket crystal 1, transistor 4; mounting method: plug-in 35 contact female connector; has top and bottom covers; function, circuit card assembly, crystal oscillator; reference data, a1a5, ti-6750, mark-1b

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
