Overall Length:

6.000 inches

Overall Height:

0.342 inches

Overall Width:

5.500 inches

End Application:

Antenna-receiver-transmitter group, missile tracking

Special Features:

Major components: capacitor 25; diode 11; integrated circuit 8; printed wiring board 1; resistor 41; transistor 3; departure from cited designator: one; mounting configuration: rack mtd

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
