Overall Length:

9.060 inches

Overall Height:

1.220 inches

Overall Width:

5.250 inches

Special Features:

Decodes preselected count to produce output trigger. Delays output trigger from system trigger in 0.1 mile increments to maximum of 1 part. 15v min. Trigger jitter less than 100 nanoseconds; major components: 1pwb, 31 resistors, 5 capacitors, 2 diodes, 5 transistors, 5 integrated circuits, 1 connector; reference data: ref: eng drwg no. 3531415-0501

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
