Overall Length:

6.800 inches

Overall Height:

1.000 inches

Overall Width:

3.900 inches

Special Features:

Components: 3 radio freq. Bead, 49 fixed capacitors, 4 var capacitors, 24 radio frequency coils, 2 rf i filter, 9 pedestal transistors, 4 square pins, 30 fixed resistors, 12 semiconductor device, diodes, 9 transistors, 1 pwb; mounting configuration: four 4-40 tapped holes; fsc application data: amplifier, power except navigation, nonairborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
