**Overall Length:**

6.800 inches

**Overall Height:**

1.000 inches

**Overall Width:**

3.900 inches

**Special Features:**

Components: 3 radio freq. Bead, 49 fixed capacitors, 4 var capacitors, 24 radio frequency coils, 2 rf i filter, 9 pedestal transistors, 4 square pins, 30 fixed resistors, 12 semiconductor device, diodes, 9 transistors, 1 pwb; mounting configuration: four 4-40 tapped holes; fsc application data: amplifier, power except navigation, nonairborne

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A511k0
