End Application:
Test set no. Bh112jb-131, a-10a acft
Features Provided:
Electrostatic sensitive
Criticality Code Justification:
Cbbl
Special Features:
Amplifier 5, capacitor 20, diode 7, flip-flop circuit 4, integrated circuit 6, printed wiring board 1, resistor 52, syncro digital converter 1,
transistor 6
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
