Overall Length:

4.500 inches

Overall Width:

4.100 inches

Special Features:

depth: 0.345 in.; major components: resistor 13; capacitor 10; semiconductor device diode 5; transistor 2; microcircuit digital 1; microcircuit linear 10; connector plug electrical 1; printed wiring board 1; fsc application data: radio and television communication equipment except airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
