End Application:

Airborne navigation equip

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Product Name:

Modem control type decoders and bite

Special Features:

Pwb 1, cap 5, diode 12, transistor 10, res 49, transistor 10

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
