End Application:

F-15 acft; processor, radar target data, digital 3173042-100

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Product Name:

Control interface unit

Special Features:

Major components: capacitor 291; microcircuit 397; oscillator 1; printed wiring board 1; resistor 14; reference data and literature: t.O.

12p2-2apg63-104

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
