End Application:

F-16 aircraft age.

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Product Name:

Circuit card assembly, dac interface

Special Features:

Cap 13, conn 2, inductor 4, ic 14, pwb 1, relay 24, resistor 22; nha p/n 2212315, used on mod 345 next higher assembly - ais test station 2120300-309

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
