Overall Length:

4.300 inches

Overall Width:

2.250 inches

Features Provided:

Electrostatic sensitive

Special Features:

Major components: capacitor 6; semiconductor device 1; coils 3; transistors 3; resistors 16

Precious Material And Location:

Contact edge of board external surface gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
