**Overall Length:**

4.625 inches

**Overall Width:**

4.625 inches

**Features Provided:**

Electrostatic sensitive

**Special Features:**

Major components: printed wiring board 1; capacitors 28; semiconductor device diodes 5; coils 7; transformer 1; transistors 5; resistors 35; mounting configuration: three 0.187 in. Holes

**Precious Material And Location:**

Contact edge of board gold

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A511k0
