Overall Length:

3.597 inches

Overall Width:

3.000 inches

End Application:

U/w switching interface control unit

Features Provided:

Electrostatic sensitive

Special Features:

Major components: capacitor 4; printed wiring board 1; relay 3; diode 2; transistor 1; resistor 9; amplifier 1

Precious Material And Location:

Tab only gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
