End Application:

Aircraft model a-7

Special Features:

Printed wiring board 1, amplifier 1, capacitor 17, diode 10, transistor 15, resistor 56; mounting configuration: plug-in mtd; fsc application data: test set, computer an/usm 453

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
