End Application:

Improved f-16 acft

Special Features:

Used on improved an/apg-66 fire control radar (aircraft gunnery fire control component); part of programmable signal processor; components: module subassembly 1, ejector 2, integrated circuit 214, microcircuit resistor 2, microcircuit network 36

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:
