End Application:

An/fsq-14 geodss; logic card, high speed two-input nand gate

Special Features:

Omajor components: capacitor 1; integrated circuit 4; printed wiring board 1; resistor 5; has 16 independent 2-input high-speed nand gates that operate from a 5-volt supply and each is capable of driving eleven loads

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
