End Application:

An/apq-164 b-1b aircraft; radar antenna system

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Product Name:

Roll compensation and power amplifier

Special Features:

Major components: printed wiring board 1; heatsink 1; capacitor 28; resistor 41; transistor 2; coil 2; diode 4; microcircuit 11

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
