Features Provided:

Electrostatic sensitive

Special Features:

Component quantity: printed wiring board - helmet signal processor 1, connector 100, ctc 1, polarizing key - nafi 2, microcircuit 25, quad 2 - input nor 2, dual d f/f pres/clr 3, hex inverting buffer 2, resistor 91, capacitor 46, transistor 8, diode 4, ejector printed circuit card 2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
