End Application:

Peacekeeper missile

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Product Name:

Card for control logic

Special Features:

Sprinted wiring board 1; flex cable 1; microcircuit 7; capacitor 9; integrated circuit 1; connector 9; insert key 9; jackscrew 2; cable assembly 1; specific force integrating receiver p/n 106100; hardness critical and electrostatic sensitive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
