End Application:

Peacekeeper missile

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Product Name:

Servo and resolver processor

Special Features:

Eprinted wiring board 1; microcircuit 9; capacitor 20; diode 1; resistor 3; flex cable 2; connector 3; specific force integrating receiver p/n 106100 on i.M.U.; hardness critical and electrostatic sensitive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
