Overall Length:

3.052 inches

Overall Width:

2.953 inches

End Application:

Air operations central an/tyq-2 and operator group an/tya-9

Features Provided:

Electrostatic sensitive

Special Features:

Component quantity: driver amplifier capacitor 7, diode 11, integrated circuit 1, resistor 31, transistor 8, printed wiring board 1; notice: this circuit card assembly must be used with conductive glass assembly, nsn 5895-01-195-9750, cage 54041, part number 41368 only

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
