End Application:

F-16c/d acft

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Product Name:

Digital module cdp/pibuf programmable signal processor

Special Features:

Module subassy 1, cap 14, microcircuit device 217; part of programmable signal processor, used on improved an/apg-68 fire control radar

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
