End Application:

Peacekeeper guidance

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Product Name:

Inverter no. 1

Special Features:

Printed wiring board 1; power transformer 1; inductor 2; connector 1; capacitor 40; resistor 60; transistor 9; integrated circuit; diode 17; transducer 1: contains nuclear hardness critical and electrostatic sensitive components

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
