**End Application:**

Peacekeeper guidance

**Features Provided:**

Electrostatic sensitive

**Criticality Code Justification:**

Cbbl

**Product Name:**

Inverter no. 1

**Special Features:**

Printed wiring board 1; power transformer 1; inductor 2; connector 1; capacitor 40; resistor 60; transistor 9; integrated circuit; diode 17; transducer 1: contains nuclear hardness critical and electrostatic sensitive components

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A511k0
