**End Application:**

B-1b aircraft age.; test station, radar electronic warfare

**Features Provided:**

Electrostatic sensitive

**Criticality Code Justification:**

Cbbl

**Product Name:**

High frequency measure

**Special Features:**

Omajor components: printed wiring board 1; insulator connector 1; connector 6; terminator 26; cable 15; microcircuit 33; diode 14; relay 54; capacitor 108; resistor 196; contact 8; mounting configuration: plug-in type

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A511k0
