End Application:

B-1b aircraft age.; test station, radar electronic warfare

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Product Name:

High frequency measure

Special Features:

Omajor components: printed wiring board 1; insulator connector 1; connector 6; terminator 26; cable 15; microcircuit 33; diode 14; relay 54; capacitor 108; resistor 196; contact 8; mounting configuration: plug-in type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
