End Application:
Electronic warfare, b-1b
Features Provided:
Electrostatic sensitive
Criticality Code Justification:
Cbbl
Special Features:
Printed wiring board 1, resistor 73, resistor network 4, transistor 4, integrated circuit 18, diode 15, capacitor 28, terminal 4, insulator 4,
connector 1, pkey polarize
Shelf Life:
N/a
Unit Of Measure:

Demilitarization:
Yes - demil/mli
Filg:
A511k0
