End Application:						
Milstar weather satellite, amplifier						
Features Provided:						
Electrostatic sensitive						
Criticality Code Justification:						
Cbbl						
Special Features:						
Component quantity: printed wiring board 1, co	onnector 5, resistor 63,	transistor 1,	microcircuit 12,	capacitor 52,	diode 8,	contact 12,
inductor 2						
Shelf Life:						
N/a						
Unit Of Measure:						
Demilitarization:						
Yes - demil/mli						
Fiia:
