End Application:

F15e elec test stat

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Special Features:

Channels: two redundant mil-std-1553b buses; programmable modes: bus controller, remote terminal, bus monitor; memory: 8 k x 16 bits; functions: address recognition, manchester coding and parity validation, bit count, mode code response; interrupts: mil-std-1553, word count, queue complete, queue flip; additional features: online built-in loop tes (bit), time tag counter (1us/lb) , software programmable rt address

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
