End Application:

An/tmq-52

Special Features:

The vlf-navaid processor mwv202 is a plug-in e1 size eurocard unit for vlf and loran signal processing. It consists of three main parts: control processor, filter board, and main board. The control processor and filter board are modules that are installed on the main board. The unit is connected to the rest of the system through a bi-directional serial communication channel or through an arcnet local area network. The mwv202 has input connectors for local and remote channel navaid signals.
