End Application:

Used on tif2812dsp digital signal processor

Special Features:

leee; 5 vdc; compatible w/ezdsp wire wrap prototype card

Functional Description:

Application: controls motor, motion; develops algorithms; replaces microcontroller in socket w/fuzzy logic development software; implements finite impulse response filter on audio input

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A511k0
